CREATE TEST API

6 configured endpoints

Name	Method	Mock URL	Status	Delay	Actions
Delete product	DELETE	/mock/users	☒ Active	0 ms	TEST EDIT DELETE
Update product price	PATCH	/mock/users	☒ Active	0 ms	TEST EDIT DELETE
Update product	PUT	/mock/products/{id}	☒ Active	0 ms	TEST EDIT DELETE
Create product	POST	/mock/products	☒ Active	0 ms	TEST EDIT DELETE
Create USER	POST	/mock/users	☒ Active	0 ms	TEST EDIT DELETE
Get USER	GET	/mock/users	☒ Active	0 ms	TEST EDIT DELETE

Pretty-print ☐
{ "items": [{ "id": 1, "name": "Hari", "email": "hh@example.com" }] }

Create mock API

Name *
Create Product

HTTP method
POST

Endpoint path *
/Product
Supports tokens, e.g. /products/{id}

Response status
200

Response delay (ms)
0

Response JSON *

```
{
  "success": true,
  "message": "Product created successfully",
  "product": {
    "id": 201,
    "name": "Gaming Mouse",
    "price": 1499,
    "category": "Gaming"
  }
}
```

☐ Private API ☐ Require JWT on mock request
